Change Analysis of Sales

😻 SILVER LIFE

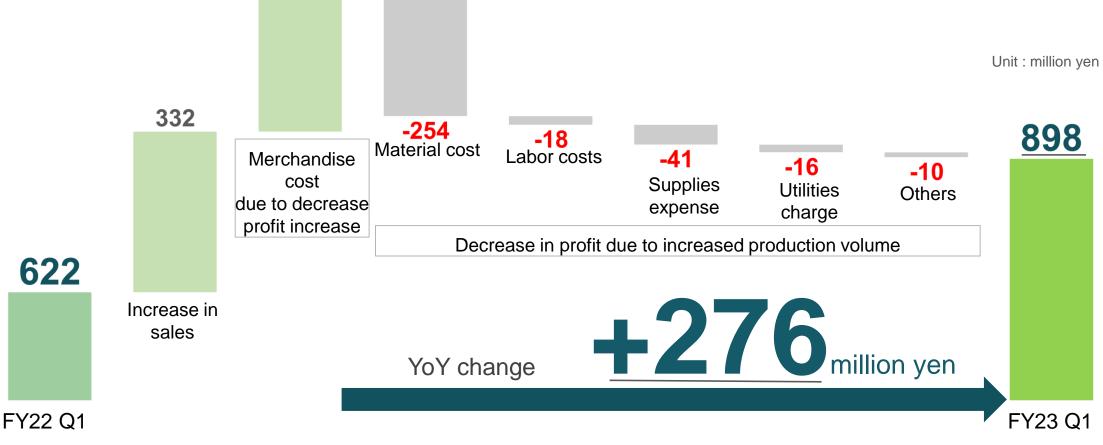

Steady performance in all divisions. Propose a lot of sales promotion measures \rightarrow Execute \rightarrow Repeat failures, leaving only good measures. Unit : million yen

Significant increase.

In addition to the increase in sales, the shift to in-house production of 30% of the outsourced products from October has also had an impact.

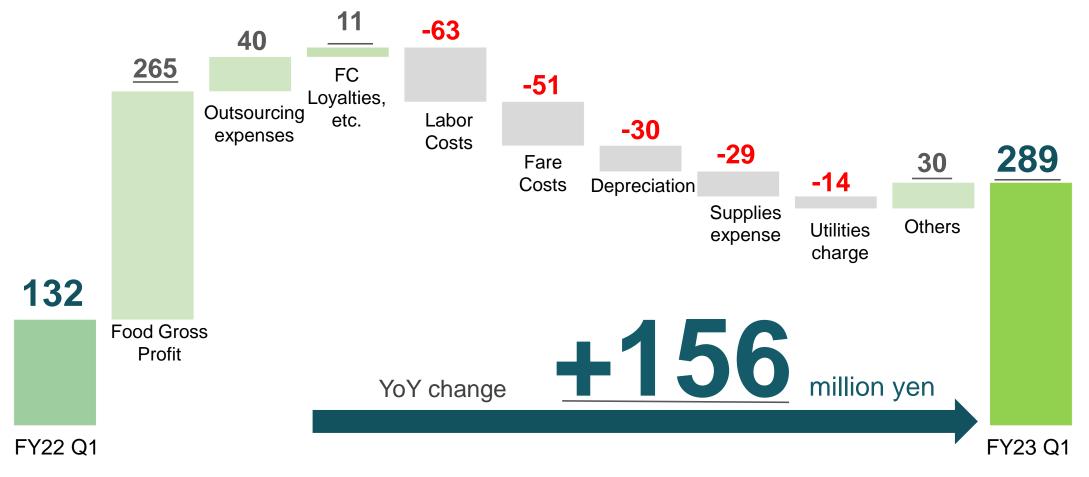

SILVER LIFE

Increase in gross profit will absorb various cost increases.

Logistics will also become more efficient from October (3 times a week delivery to FC stores \rightarrow 2 times a week), and the ratio of freight costs to sales amount will also be reduced.

Impact of switching to in-house manufacturing

SILVER LIFE

From October 2022, nearly 30% of the chilled products that had been outsourced were switched to in-house manufacturing.

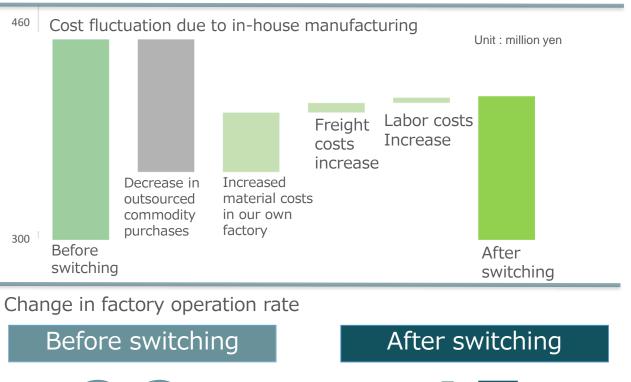

①Increase efficiency by switching to in-house manufacturing

Substantial	reduction	in	outsourced	Commodity
cost.				

Although the material cost and various manufacturing costs increased due to in-house manufacturing, there was a cost reduction effect of about 10% in the switching range.

②Increase in factory operation rate

Gradually rising, and some bottlenecks have become apparent due to the switching in October, so we plan to add some equipment (about 100 million to 200 million, 6 to 9 months until arrival)

•Sales Plan is stated on the Sales Plan per next page. •Gross profit is expected to increase significantly due to the transfer of chilled products to the company's own factory. However, fare costs, which were previously borne by the outsourced manufacturing factory, are now included in the company's SG&A expenses. •S.G.&A. expenses include an increase in advertising expenses due to aggressive sales promotion measures, and depreciation of the Kazo Distribution Center.

Our Company Features and Advantages

Our Advantage : Franchise chains Network

- Low-cost opening (non-visit-type stores with no restriction to location / no large kitchen equipment required)
- > The simple process of preparing cooked ingredients and delivering (the business can be started alone)
- Stable supply of high-quality cooked ingredients from FC headquarters (no cooking experience required)

Our Advantage: Enabling high-mix random production

A meat buns dedicated factory (1 million meat buns produced daily flow from a buns dedicated machine to a conveyor. Although there are meat buns and bun with bean-jam filling differences, they are "Principally the same product group"). Since meals are distributed daily, the same product group cannot be provided every day. 12 items made today, 12 items made tomorrow, 12 items made on the 3rd day, all should be different.

<u>Only few factories have multi-variety random production lines</u> which are thought to be inefficient (Usually cannot be maintained without a certain sales scale like our company)

As a result: Managing low-cost manufacturing that generates profit despite the large variety of products

Our Advantage : Abundant menu with low prices

- > Tenderness, seasoning, and nutritional balance suitable for the elderly to eat
- > Rich menu variety (more than 1,000 items) you will never get tired of for your everyday meals
- > Delivered to franchise chain stores refrigerated (chilled) to improve texture (regular meals)
